This is the discussion section for our Math 231 class. Realize that you'll only be spending two hours a week in standard lecture, so these discussion sections are important. We will primarily use our time to discuss questions you have on the lectures and homework, and I expect active participation. We will also have a weekly quiz during these meetings. If you need to miss a quiz due to illness or university related activity, bring appropriate documentation and we'll work something out. Advance notice is significantly preferred. If you have disability concerns, I need to see a DRES letter as soon as possible.

Phones should not be used. I would prefer they be turned to silent or turned off entirely: even on a vibrate setting many phones are distracting. Do not text during class.
